Professional summary

Detail-oriented Computer Information Technology (CIT) professional with hands-on experience in network design, cybersecurity principles, virtualization (VMware ESXi), and AWS cloud environments. Experienced in configuring secure network infrastructures, implementing access controls, and supporting enterprise-level systems through technical projects and lab environments. Combines strong technical skills with customer service and sales experience, demonstrating effective communication, adaptability, and problem-solving in fast-paced environments. Seeking to contribute to secure, scalable, and efficient IT solutions.

Education

- **California state university of Northridge (Expected graduation December 2026)**
- B.S in Computer Information Technology (CIT)
- **Course work:** Computer Hardware and Software; Networking; Architecture of the Internet; Internet Protocols; Browser Technologies; Web page Design; Blockchain; Ever increasing threats related to Cybersecurity and Information Privacy; System Analysis and Design

Skills

- **Cybersecurity:** Firewall configuration, VLAN segmentation, IDS/IPS fundamentals, AES basics
- **Networking:** IP addressing & subnetting (CIDR), TCP/IP, DNS, DHCP, packet analysis (Wireshark)
- **Systems & Cloud:** VMware, Windows Server, Linux (Ubuntu),, AWS
- **Other:** SQL fundamentals, technical documentation, customer support, problem-solving

Certification

- CompTIA Security+ (SYO-701) Complete Course & Exam
- Foundations of Cybersecurity
- Play It Safe: Manage Security Risks
- Connect and Protect: Networks and Network Security
- AWS Academy Graduate - Cloud Foundations

Projects

- **Krypto Inc. – OLTP & Inventory System -** Designed an e-commerce OLTP system; developed ERD/EERD diagrams, DFDs, and database architecture for transactional operations**.**
- **Matador Tech – Secure Network Design -** Built a secure enterprise network using VLAN segmentation, IP subnetting, firewall configuration, and three-tier architecture.
- **Li-Fi (Light Fidelity) Research -** Analyzed Li-Fi wireless technology, focusing on security, performance, and enterprise applications.
- **Network Infrastructure & IP Design -** Created IP addressing schemes, subnet calculations, and VLAN configurations for simulated enterprise environments.
- **Virtualization & Cloud Deployment -** Installed VMware ESXi, deployed Windows/Linux VMs, and built AWS infrastructure (EC2, S3, IAM, VPC, RDS) with Multi-AZ redundancy.

Employment

Sales Associate Crocs, Glendale, CA*November 2024 – Present*

- Assist customers in selecting products, providing knowledgeable recommendations to enhance their shopping experience.
- Deliver exceptional customer service in a fast-paced retail environment, ensuring satisfaction and building brand loyalty.
- Handle transactions efficiently at the point of sale, including processing payments, returns, and exchanges.
